What is this product?

Type

The Sub-Fund is part of ALTEX fund. The Depositary is Quintet Private Bank (Europe) S.A.

Term

The investment horizon is medium term and should be at least 5 years.

Objectives

The Sub-Fund aims to generate long term capital appreciation and preservation by investing in a portfolio of moderate to high return investment strategies, while seeking to contain volatility and risk with complementary currency and beta hedging strategies.

The assets of the Sub-Fund will be invested in a variety of different types of assets, including equity, fixed income, interest rates, or forex, or directly or indirectly through ETFs and derivatives instruments, as further defined in the offering document.

To achieve its objective, the Sub-Fund diversifies across a narrow number of investment strategies (between 3 and 9, at the Management's Company's discretion) such as: Equity long/short (that seeks to take a long position in under-priced stocks while selling short overpriced shares), Equity Market neutral (to exploit differences in stock prices by being long and short an equal amount in closely related stocks), Equity Risk Arbitrage (dynamic management of factor investing), M&A Arbitrage (simultaneous purchase of stock in a company being acquired and the sale of stock of the acquirer), Currency Arbitrage and Carry trade (the low-yielding currency is used to fund the trade with a currency with higher interest rate), Global Macro and Managed Futures (Long and Short positions are expressed in interest rates, currencies, equities and volatility on both a Relative Value and a directional basis in countries around the world), slope carry (rates, volatility, dividends, equity; slope carry strategies seek to profit from different future prices at different maturities).

Intended retail investor

This Sub-Fund is open only for subscriptions by Institutional Investors, Professional Investors and investors receiving advisory services or discretionary investment management services as defined by the MiFID II Directive and having separate fee arrangements in relation to those services and activities.

What are the risks and what could I get in return?

Risk Indicator:

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund is not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Other risks: Credit risk, Liquidity risk, Counterparty risk, Operational risk, Derivatives risk, Currency risk, Event risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance-Scenarios:

	Average return each year	44.0 %	9.5 %
Worst case scenario	You could lose some or all of your investment		

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between October 2021 and October 2022 (If you exit after 1 year), September 2017 and September 2022 (If you exit after 5 years).

Moderate scenario: This type of scenario occurred for an investment between February 2024 and February 2025 (If you exit after 1 year), April 2019 and April 2024 (If you exit after 5 years).

Favourable scenario: This type of scenario occurred for an investment between March 2020 and March 2021 (If you exit after 1 year), November 2019 and November 2024 (If you exit after 5 years).

What happens if ALTEX Asset Management S.G.I.I.C. S.A. is unable to pay out?

The investments of the fund are held separately from the assets of ALTEX Asset Management S.G.I.I.C. S.A. as fund management company and from the corresponding custodian bank. Thus, you will not lose your investment in the event of a possible insolvency of ALTEX Asset Management S.G.I.I.C. S.A.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- Investment: 10,000 EUR

Costs over Time	If you exit after 1 year	If you exit after 5 years
Total costs	172 EUR	1,095 EUR
Annual cost impact (*)	1.8 %	1.8 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.1 % before costs and 5.4 % after costs.

Composition of Costs

The table below shows the impact if you exit after 1 year.
